

25/08/2011

To whom it may concern,

Electro Safe Ltd. and Ishay Golan have been working with the Electrical Division Since 2003.

The company provides Supervision services and technical support to fire detection and extinguishing systems in various projects of the engineering division.

Ishay supervised large and small projects in all airports and all border terminals.

Due to his background and professional design abilities, Ishay often performs small integrity and / or revisions of the design of fire detection and extinguishing systems like power plants, field electronic equipment structures.

The supervisory capabilities of Electro Safe and Ishay Golan brought IAA savings in construction costs of fire detection projects.

When implement various projects demonstrated great skill, vision, maneuverability and precision for performance up to the project completion.

Ishay feels obligated to the organization and gives everything he has to our success in terms of meeting the project schedule, quality performance and cost savings in construction projects.

Yuval Margulis,
Chief Electrical & HVAC Engineering
Israel Airports Authority
